

Mock 2020 Linux part

```
$ ls  
grades.csv p35.cpp koalas.py p40.py p42.py
```

To list all files that end with py

```
$ ls *.py
```

What is the output after executing the following commands?

```
$ mkdir programs  
$ ls p* | wc -w
```

ls p* returns **p35.cpp** **p40.py** **p42.py** **programs** and wc -w counts the number of words which is 4.

Command to move all the files ending in .py to the folder programs

```
$ mv *.py programs
```
